

## **Amendments to the Abstract**

Please amend the Abstract as follows:

Described herein is a tensioner (2) for a belt (10) of a drive (1) of a motor vehicle, comprising: at least two idle pulleys (15, 16) designed to co-operate with respective belt runs (32, 34) of the belt (10); two arms (13, 14) bearing the pulleys (15, 16); and elastic means (17) acting at least indirectly on the arms (13, 14) for tensioning the belt (10), in which the arms (13, 14) are constrained to one another, and at least one of the arms (13, 14) is hinged to a first mobile axis (C).
